LOG IN

Account Management

Thank you for your interest in the FITBIR system. Please complete the following steps to request an account:

1. Download the appropriate template(s) from the list below.

Administrative File Templates

- Fill in the requested fields in the form(s) that require approval, then have it reviewed and approved by your institution.
- Scan required form(s) and save to your computer.

Search:

FILE TEMPLATE	REQUIRED FOR PRIVILEGE
Data Submission Request	Data Dictionary, Data Repository, GUID, ProFoRMS, Yearly Account Renewal
Data Access Request	Query
Biographical Sketch	Yearly Account Renewal

Showing 1 to 3 of 3 entries

First | Previous | 1 | Next | Last

2. Upload your approved file(s) to support your request here. For each required form, select the appropriate File Type and click Choose File (or Browse). Find the approved file(s) on your computer and click Upload.

Upload Supporting Documentation

Please upload your signed administrative documentation to support your request here. Selected templates are available below.

Account Management
Fields marked with a * are required.
4. Select the following privileges and permissions for this account.
Account Privileges
Choose your role (using the radio buttons): Each role will auto-populate recommended privileges below.
Data contributor and retriever with ProFoRMS
Data contributor and retriever without ProFoRMS
Other
Data retriever
Data and biosample retriever
Based on the selected role, the following privileges will be pre-populated for this account; check or uncheck boxes, as needed:
Account - Allows user to log into system, manage profile and password, and upload documentation
Data Dictionary - View and submit requests to create or edit data elements and form structures
GUID - Create and view study subject Global Unique Identifiers (GUIDs)
Data Repository - Create and administer studies containing research data; validate, upload and download datasets
Query - View, filter, and download research data by study.
ProFoRMS - Create, design, and administer forms for prospective data collection
Meta Study - Create and administer Meta Studies containing research data, upload and download study documentation and data artifacts
Data Access Permission Groups
Please check the data access permission group(s) for which you are requesting access. Please note that requesting data access requires administrator approval and may require Data Access Committee approval and additional uploaded documentation. You will receive notification regarding approval or if further action is required.
No permission groups available
5. When all entries are complete, click SUBMIT REQUEST.
The Approval Committee will review your request and notify you using the email address in your Contact information above.
If you have any questions, contact NINR-brics-ops@mail.nih.gov .

About Us

The mission of the National Institute of Nursing Research (NINR) is to promote and improve the health of individuals, families, and communities. To achieve this mission, NINR supports and conducts clinical and basic research and research training on health and illness, research that spans

Research

The NINR, part of the National Institutes of Health (NIH), is a leading supporter of clinical studies in symptom science and self-management research. To harmonize data collected from clinical studies, NINR is spearheading an effort to develop CDEs in nursing science. Here is the list of the approved

Module Overview

Modules: Building Blocks for the Research Life Cycle

There are a variety of key software modules comprising this system. These modules support the vision of interconnectivity and collaboration among the research communities, as well as, provide a combination of web-based functionality and downloadable tools that support data definition, data contribution, and data access throughout the research life cycle.

View Studies

View Studies lists the studies that the user has permissions to view. The provided filters will allows users to filter the list by ownership, data submission status, and data type. The search capability allows users to search by Study Title, Study ID, Principle Investigator (PI), and by the Permission Type that the user holds for a particular study (Owner, Admin, Read, Write).

Results are shown in a tabular format to include the following:

ship: all | All studies | All data types | Search

TITLE	STUDY ID	PI	DATA TYPES	PERMISSION
StudyByUser	NINR-STUDY0000203	PI		Admin

Submission Tools

Submission Tools - Validation and Upload

MIPAV Tool

Download Tool

Data Repository Administration

Validate and Upload Data

The Submission Tools assist researchers with the validation and upload of data into the repository. The validation component verifies that submitted data conforms to the required format and range values defined in the Data Dictionary. The tool imports the Data Dictionary and validates the metadata associated with the files identified by the user for submission against the data dictionary. It provides a report of any data discrepancies and warnings. If errors are found, a submission package cannot be created. After successful creation of a submission package, data can be submitted to the system with the upload component. The tool, which runs as a Java Web Start application, runs locally on a user's computer, requiring the Java runtime environment to be installed.

EULA Agreement

Data Privacy
This system is a collaborative environment with privacy rules that pertain to the collection and display of imaging data. Before accessing and using this systems, please ensure you familiarize yourself with our privacy rules available through the Access Request and supporting documentation.

Collection of this information is authorized under 42 U.S.C. 241, 242, 248, 281(a)(b)(1)(P) and 44 U.S.C. 3101. The primary use of this information is to facilitate medical research. This information may be disclosed to researchers for research purposes, and to system administrators for evaluation and data normalization.

Rules governing submission of this information are based on the data sharing rules defined in the Notice of Grant Award (NOGA). If you do not have a grant defining data sharing requirements, data submission is voluntary. Data entered into the system will be used solely for scientific and research purposes and is designed to further the understanding the disease. Modification of information may be addressed by contacting your system administrator at NINR-brics-ops@mail.nih.gov. Significant system update information may be posted on the site as required.

NOTE: Declining this license disables upload functionality. Only the Validation Tool will display.
